

**Home improvements** are constantly in progress at GSCH. A year ago 4" of foam insulation was added to the walls of the inner courtyard and covered with stucco. A volunteer group from Holland painted the walls and dug a hole for a trampoline. Afterwards the entire area was cemented and will be covered eventually with a synthetic grass-like material. This will provide a play area for year round use. Left: Painting the walls; Hand mixing cement; Preparing the pit for the trampoline to rest in; Pouring slabs of cement. Below: Erica Tomori helps prepare a drain hookup; Finished cement work.
